Submit a valid service request
SIT-001
Work in progress
High
No execution
Prerequisites and test steps
PREREQUISITES
1. The SIT environment has passed its environment readiness checks.
2. The service request application is deployed and accessible.
3. An active employee test account is available.
4. The employee has permission to create service requests.
5. Valid test data is available.
ACTION
EXPECTED RESULT
1
Open the service request application.
The application loads and displays the login page.
2
Log in using a valid employee test account.
Authentication succeeds and the employee dashboard is displayed.
3
Select Create New Service Request.
The service request form is displayed with all mandatory fields identified.
4
Enter valid information into all mandatory fields.
The entered information is accepted without validation errors.
5
Select Submit.
The request is successfully submitted and a confirmation message displays a unique request reference.
6
Navigate to My Service Requests and locate the newly created request.
The request is displayed with the correct reference, submitted information and a status of Submitted.
